

A Leading Flat Rolled Toll Processor Located at Severstal Columbus

Mississippi Steel Processing LLC (MSP) is a new company committed to service excellence in toll processing, storage, logistics and first-stage fabrication of hot band and HRPO. Our strategic location, adjacent to the Severstal Columbus mill, makes us the processor of choice for steel distributors and mill-direct OEM customers throughout the South.

Our state-of-the-art facility, which opened April 2011, handles a broad range of steel: up to 90,000 lb coils of 0.625" thickness. We produce sheets up to 84" wide by 60' long and slit coils up to 0.250" – all packaged to your specifications.

MSP customers enjoy 24/7 online access to their job status, inventory, QC records and shipping information through our secure metals management web portal.

Facility Overview

- Phase 1: 135,000 ft²
 - 72,000 ft² of master coil storage
 - 55,800 ft² of processed materials storage
 - 7200 ft² office/customer meeting space
- Sheet Processing Center
 - two overhead crane drive-through bays
- Slit Coil Processing Center
 - overhead crane drive-through bay
 - three forklift tailboards
- Phase 2: +36,000 ft²
 - hot rolled P&O storage
 - served by rail into the building
- Phase 3: +72,000 ft²
 - master coil storage and processing space
- Phase 4: +45,000 ft²
 - finished goods and manufacturing space

Equipment & Services

- Bradbury e-Drive Cut-to-Length line*
 - sheets up to 0.625" x 84" x 720"
 - Pro-Eco Slitter*
 - 73" x 0.250" high strength steel
 - Heavy Gauge Slitter* (*coming in 2012*)
 - 74" x 0.125" - 0.625"
 - Avon Packaging Line
 - 15,000 lb., dual hoist
 - Radio-Control Zenar Cranes
 - two 50 ton with rotating coil grabs
 - two 30 ton with dual 15 ton hoists plus powered sheet lifters
 - 30 ton and 40 ton with slit coil grabs
 - High-Capacity Forklifts
 - one 15,000 lb., two 10,000 lb. capacity
- * *accept coils up to 90,000 lbs.*

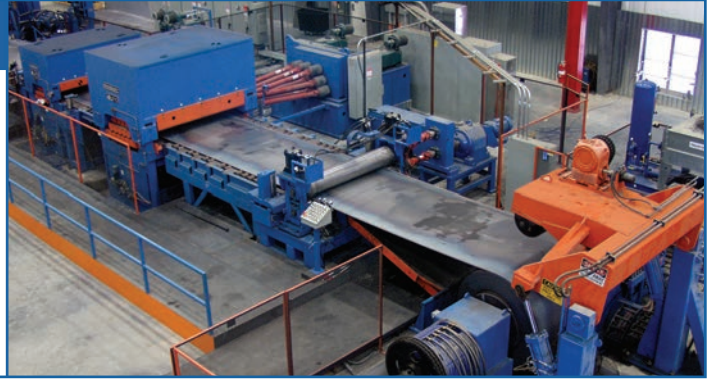

Slitting • Cut-to-Length • Storage • Logistics • Fabrication

MSP provides complete toll processing and materials management services, including master coil storage, processed material storage and in-house logistics services. Our location on the Severstal mill campus eliminates inbound freight cost, while outbound deliveries can be by rail or truck. Our capability to handle extra long sheets - up to 60 feet long - is unique in the region. We're adding on-site first stage fabrication services, such as laser and plasma cutting, forming and welding, as a supplement to the coil processing services described below. For more information, visit www.mssteelpro.com.

Cut-to-Length Specifications

Material Type:	<i>Inquire</i>
Gauge Range:	<i>0.060" to 0.625"</i>
Width Range:	<i>36" to 85"</i>
Length Range:	<i>4' to 60'</i>
Length Tolerance:	<i>+/- 0.125"</i>
Max. Bundle Weight:	<i>30,000 lbs.</i>

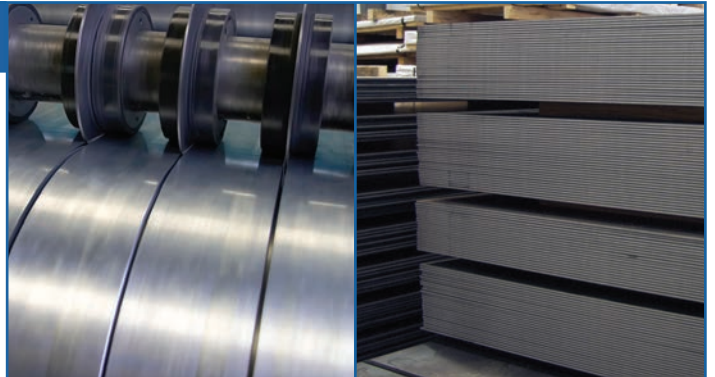

Slitting Line Specifications

Material Type:	<i>Inquire</i>
Gauge Range:	<i>0.040" to 0.250" high strength steel</i>
Max. Width:	<i>73"</i>
Max. Entry Coil:	<i>90,000 lbs.</i>
Max. Exit Weight:	<i>60,000 lbs.</i>

New Lines Being Added in 2012

	<u>Slitting</u>	<u>Cut-to-Length</u>
Max Gauge:	<i>0.625"</i>	<i>0.250"</i>
Max. Width:	<i>74"</i>	<i>75"</i>
Max. Length:	<i>--</i>	<i>20'</i>
Max. Entry Coil:	<i>90,000 lbs.</i>	<i>80,000 lbs.</i>
Added Features:	<i>--</i>	<i>Edge Trim</i>
